

## Bartec Specialty Tools

More vehicles are featuring electronic braking or parking brake systems. This means, when servicing brakes, a tool is needed to relax or disengage the parking brake. The Quick Service Solution is now available!

- ✓ Allows proper and safe disengaging of brake system
- ✓ Tool guides the operator through the process

It's becoming more common that when replacing a vehicle's battery, that a "relearn" or "reset" is required. The Quick Service Solution is here!

- ✓ Re-calibrate Battery Management Systems
- ✓ Configure battery type
- ✓ Tool directs the operator through the process

More vehicles today require a "reset" once an oil change is completed. The QST300 guides the technician through the manual or OBDII process.

- ✓ Allows proper reset through the OBDII port
- ✓ Manual Procedures on board the tool

Use the  
Quick Service  
Tool and free  
up your Scan  
Tool!

### QST 300

Easy to use ICON  
driven menu flow!

### STANDARD APPLICATIONS
