Tire Type: Standard

Left Front	Left Rear	Right Front	Right Rear
34.9 PSI	33.0 PSI	35.7 PSI	35.1 PSI

OK 7/32" and up Tire OK for use.
Replace Soon 3/32" to 6/32" Tire is worn. Consider purchasing new tires.
Replace Today 2/32" and below Tire is no longer safe. Tire must be replaced.

The TPG200 is our mid-range tread depth and tire pressure gauge with Bluetooth data transfer. This rugged tool measures the tire in three places, easily showing the profile as well as tread depth.

The TPG200 also measures tire pressure with the detachable air chuck and hose, included with the tool. The sunlight-readable display shows all the important information. Once the tires are tested, send the data wirelessly to the computer for use in TPMS Desktop using the Bluetooth radio. Because the TPG200 displays the tire profile, it is now easier to inform customers about other safety issues, such as front end alignment and uneven wear patterns.

Features

- High-resolution display
- Protective rubber boot
- Accurate measuring of tread and pressure
- Wireless Bluetooth data transfer
- Integrates with TPMS Desktop
- Integrated LED flashlight
- Wireless inductive charging
- Quick-disconnect air hose

Benefits

- Sunlight-readable display
- Made to withstand daily use in a tire/repair shop
- Accuracy – Pressure: ± 1 psi, Tread Depth $\pm .004$ "
- Send tire data to your computer
- Consumer-friendly Inspection Report (Sell more tires!)
- Light up the workspace for faster service
- Increased durability with no hard connection failures
- Easy replacement and storage
