Rear Full Contact Camber/Toe Shim

Exact Fit - part numbers provide a precision fit for all applications. No modification to outer perimeter required as with other shim designs.

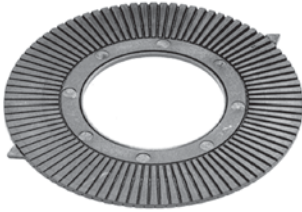

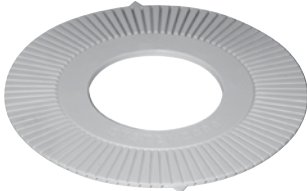

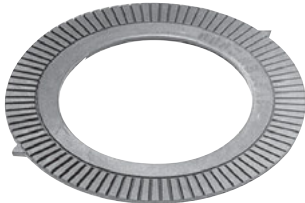

Most Accurate - Each shim is fully adjustable for camber and toe with up to 1008 settings between $1/8^\circ$ - $11/2^\circ$

Simplicity - Our 6000 series shims are compatible with the computer software in most of today's aligner. Colour coded for quick reference.

Consistent, Accurate, Predictable Results - System 6000 is simple to use and has virtually infinite adjustment, allowing the technician to "Get it Right the First Time, Every Time".

PARTS

75970 - SPACER SET (8)

This set (4 different sizes - 2 of each) aligns calliper to rotor after installation of a camber shim. Specifically designed to be used on FWD vehicles with hub mounted rear disc brakes.

GM Rear Toe and Camber Shims

Direct positive camber change (in +/- .25° increments) and positive or negative toe change (in +/-0.10° increments) is made quickly and accurately with these shims. Combine the correct toe shim with a camber shim to get the exact toe and camber change that is required. Stack up to two shims.

INDUSTRIAL GRADE LED WORK LIGHTS

LED Ruff Lites

The new generation of LEDs found in our Ruff light makes the light brighter than a 13 watt fluorescent and matches the light pattern of a fluorescent.

This LED Ruff light has our standard chemical and scratch resistant outer tube. As with all Aligncraft products, a full compliment of replacement parts are available.

Features:

- Two 4-watt 110° angle bright white LEDs provide 5,000K light and are rated at 50,000 hours
- One-watt high output LED provides a bright flashlight out the end
- Three large octagonal shaped bumpers provide impact protection to the fixture and helps prevent the unit from rolling when it is laid down
- Covered on-off switch in the handle
- CUL approved
- Adjustable steel hook
- Oil resistant all weather cord
- Made in North America
