

THE **GAZ GUZLER**

Making a Safe one man job of gas tank related repairs.

The exclusive adjustable tank supports allow one technician to safely remove the gas tank from the vehicle.

Gas tank work deals with a 'Class 1' risk.

When performing gas tank related repairs, most hazardous incidents have been proven to occur during the actual removal of the tank from the vehicle.

Fully Automatic

No manual effort required. With over twenty years of proven reliability and productivity, the 'Gaz Guzler' utilizes the same air powered motor and pump configuration as our original system. One control lever to both drain and/or fill the vehicle tank. Our reservoir float gauge indicates when the tank is full or discharged. The 'No Flow Safety Valve' ensures that no fuel is transferred when the equipment is unattended.
