

PASSENGER CAR & LIGHT TRUCK ASSORTMENTS

We invented the color-coded master assortment more than 30 years ago and it is still going strong

A True Innovation

Perfect Equipment invented the now 'industry standard' color-coded wheel weight inventory management system.

An Inventory Solution

Using our proven heavy-duty steel storage unit with color-coded bins and labels creates an easily manageable inventory area for all of your clip-on wheel weight needs.

Full Range Available

Perfect Equipment master assortments offer a full range of products, most including all eight standard series of clip-on wheel weights from 0.25 oz. up to 3.0 oz.

Applications at a Glance

By utilizing the supplied application guide or wall chart, installers can quickly identify late-model cars and light-trucks and their corresponding clip-type name and color code.

Custom Fit Weights

Perfect Equipment wheel weights are designed to fit OEM and aftermarket alloy and steel rims perfectly. A wheel weight by any other name just isn't the same.

A Complete Solution

All of our assortments include the tools you need to complete the job, including hammers, application guides, rim gauges, wall charts and more.

75-Series Full-Size Assortments

The 75-Series wheel weight master assortments feature a heavy-duty steel floor-standing rack, wheel weights, tools & accessories. Everything you need to get the job done right. Available in lead & non-lead.
